

# FIBERGLASS TOOLS CLEANER WIPES

For the maintenance and protection of Fiberglass Poles, Rodders and Live-Line Hot Sticks

## FIBERGLASS POLE / HOT STICK CLEANER WIPES

The Jameson Fiberglass Pole Cleaner Wipes Accessory Kits removes grease, dust, and grime while leaving a protective water-repelling silicone layer without removing or affecting the gel coat on live-line tools.

- WIPE-KIT12 Accessory Kit includes 12 one-time use disposable Cleaner Towelette Wipes
- WIPE-KIT144 Accessory Kit includes one box of 144 one-time use disposable Cleaner Towelette Wipes
- Wipes help meet the daily requirement to inspect and clean hot sticks prior to each use
- The wipes safely remove contaminants that contribute to tracking hazards, and then leave tools with a protective silicone and coats telescoping sticks for easier extension
- Also works well with fiberglass rodders so they glide into conduits without sticking

Jameson Poles are NOT a “Hot Stick” - Not for Use on Energized Lines

Part Number	Description
WIPE-KIT12	Fiberglass Tool Cleaner Wipes (12pcs)
WIPE-KIT144	Fiberglass Tool Cleaner Wipes (144pcs)
